

# POWER GENERATION ENGINES

Mobile or stationary, prime or stand-by – from your leading independent supplier

# Power when you need it

Volvo Penta is one of the world's biggest independent suppliers of engines for power generation. It is our business to build and support engines that make the most of any OEM's genset design – a range of reliable, fuel-efficient diesel engines that meet a wide span of specific demands. Mobile or stationary. 24/7 or standby. In any climate: freezing or scorching, dry or wet, in deep shafts, or at high altitudes.

## Working for a better tomorrow

At Volvo Penta, we strive to make engine performance and reduced environmental impact go hand in hand. It's a top priority to continuously reduce the engine emissions and fuel consumption, while also developing and implementing new technologies such as electromobility, connectivity and automation. However, our commitment extends beyond our products and services.

We constantly evaluate our business' impact throughout the entire value chain – from economic, social and environmental points of view. Our vision is to become the world leader in sustainable power solutions.

production strengths**

**Leading-edge,  
proven technology**

**Worldwide aftermarket  
support**

# The power of independence

At Volvo Penta, we don't build gensets. Instead, our business is to be partner, build and service engines made to optimize our OEM customers' designs. We are thoroughly dedicated to supplying the necessary hardware to ensure the business success of our OEM partners, instead of competing with them. We support OEMs all the way, from the design stage to installation and aftermarket service through our worldwide network of Volvo Penta dealers.

load acceptance**

# Your OEM partner

In our close cooperation with OEMs, we not only supply robust and reliable engines. We support projects throughout the lifecycle of the equipment. Drawing on our vast experience from a wide variety of industrial segments, we help develop solutions that offer a perfect match to a given application in terms of functionality and performance. By understanding your specific needs, we add value to your work and your product.

# Power that won't quit

Power generation is about load acceptance and startability – at Volvo Penta we make engines that deliver full power the second you need it. And it's about uptime and reliability – there can be no unplanned stops. The performance of our engines is proven in the harshest environments. We have also designed our engines for outstanding fuel efficiency, which means that the total cost of ownership is kept low.
